HELPFUL HINTS

- Enter only one 3-digit code at a time.
- The first code listed isn't always the one for your component.
- If none of the codes on the list work, try Codes Scan or Auto Codes Scan.
- Green in code window within 30 seconds after pushing the device key ("TV", "VCR", Cable", "CD")
- If you remove the batteries for any reason, you have 25 codes in view plus all codes if without having to re-enter your device codes.

WARRANTY

36 DAY SATISFACTION GUARANTEE
Reecon Corporation (the Company) warrants to the original retail purchaser of this product that should the product or any part thereof be proven defective in material or workmanship within 36 days from the date of original purchase, such defects will be repaired, replaced, or at the Company's discretion, returned. This warranty does not apply to any accidental or consequential damages.

TO REPLACE THE BATTERY:
1. Remove the battery holder by pulling the plastic tab on the top of the battery holder.
2. Replace the battery with a new CR2032 battery.
3. Close the battery holder by pressing the plastic tab on the top of the battery holder until it clicks into place.

INTRODUCTION

Important note for new owners.
Thank you for purchasing a Jensen remote control. Right now, your remote will not work with any device. You will need to install the batteries and then program the remote control.

Installing the Batteries:
1. On the back of the Jensen remote control, push the lever up and pull off the battery cover.
2. Install 2 "AA" batteries, making sure the + and - marks match the diagram inside.
3. Replace the battery cover.

Troubleshooting

Problem: No power in remote control (no light).
Solution: Check battery installation and battery freshness.

Problem: The green light did not flash after the code was entered.
Solution: Enter the code within 30 seconds after pressing the device key ("TV", "VCR", "Cable", "CD"). Try the code again.

Problem: Code entered into remote, but the component doesn’t respond.
Solution: Try the next code on the list. One of the codes should work your component.

Problem: None of the codes work the component.
Solution: After trying all of the codes, try Codes Scan or Auto Code Scan.

CD SET-UP ISG-3304 ONLY

1. Turn off your CD player and insert 1 of the code listing, find the 3-digit code number for your CD brand.
2. Hold the "CD" key down until the indicator light comes on. The page should come up on the display approximately 2 seconds later.
3. Press the "SP" button to enter the 3-digit code number.
4. Test the code by pressing the "PLAY" button. The disk should turn on. If it does not, repeat steps 1 and 2 using the next code on the list.

NOTE: If none of the codes work your CD player, try Codes Scan or Auto Code Scan.

USING THE JENSEN

After you have programmed the remote control to operate multiple components, follow these steps to operate the Jensen:
1. Press the key of the component you wish to control ("TV", "VCR", "Cable" or "CD").
2. Press the "Power" key to turn on the unit. If it is not already "on", press the Power key again to turn it on.
3. Press the key of the function you wish to control. See Key Function Diagram on the next page.
CODE SCAN

Code scan is another way of finding the correct code for your component. In the method, the remotes scan through all of the codes which are contained in the remote’s memory until it finds your code.

1. Manually, turn on the component that you want to set up (TV, VCR, Cable or CD).
2. Hold the device key (TV, VCR, Cable, CD) down while the green indicator light comes on. The green light should come on after approximately 3 seconds.
3. Release the device key.
4. Press the “Power” key repeatedly until your component turns off. The green light will flash each time the “Power” key is pressed.
5. As soon as your component turns off, press the “Inter” key. This will save the code.

AUTO CODE SCAN

The auto code scan feature allows you to set up your components without having to enter in code numbers. Your Jensen will do the work for you!

1. Manually, turn on the component that you want to set up (TV, VCR, Cable or CD).
2. Hold the device key (TV, VCR, Cable, CD) down while the green indicator light comes on. The green light should come on after approximately 3 seconds.
3. Release the device key.
4. Press the “Surf” key within 33 seconds. The green light will remain on during the auto code scan process.
5. As soon as your device turns off, press the “Inter” key. This will save the code. You have now saved in which to press the “Enter” key. Otherwise, the code will not be saved and you will need to return to Step 1 and start over.

CODE READBACK

If you did not write down the code numbers when you programmed your remote control and you haven’t removed the batteries, your Jensen can tell you what your codes are. Just follow these instructions.

1. Hold the device key of the component for which you would like to know the programmed code (TV, VCR, Cable, CD) down until the green indicator light comes on. The green light should come on after approximately 3 seconds.
2. Release the device key.
3. Press the “Enter” key.
4. Count the number of times the green light blinks. There will be three numbers, separated by a two-second pause.

Example: 4-blinks—press-blank—blank—press 10 times
Note: 10 blinks =

Make sure you write the code numbers below for future use.

TV: 
VCR: 
Cable: 
CD: 

SD-380 SMART LITE INSTRUCTIONS

To turn on the light on your Smart Lite SD-380 remote control:

1. Press any key on the remote control. The remote control will light up and stay on for 2 seconds.

The light will automatically turn off after 2 seconds without a key press. This helps to conserve the batteries.

SURF TV CHANNEL SCAN

The Surf feature allows you to surf through the TV channels without having to press the "Channel +" key. The Surf feature is currently programmed at a speed of 8. However, you can program the speed at which you Surf thorough the channels to be faster or slower than the current setting.

To program the speed of the Surf feature:

1. Hold the "Surf" key down until the green indicator light comes on. The green light should come on after approximately 3 seconds.
2. Press a number key, 1 (slowest), 3 (medium), or 8 (fastest), starting from the second button in.

CAUTION: The Surf feature will not work unless the Surf key has been pressed.

MULTI FUNCTION SEQUENCE

The Multi feature allows you to perform multiple functions (a series of up to 10 remote control key presses) with the press of one key. For example, you can program your remote to turn on the TV, turn to Channel 1 on the VCR, and record with one key press.

A. To program a Multi function sequence (see example below before following these steps):

1. Hold the Multi key down until the green indicator light comes on. The green light should come on after approximately 3 seconds.
2. Press the TV key.
3. Press the VCR key.
4. Press the Channel + key.
5. Press the Volume + key.
6. Press the Stop key.
7. Press the Multi key.

The following is an example of how to program a Multi function sequence (with 6 key presses) that will turn on the TV, tune to channel 9, turn on the VCR, and record.

1. Hold the Multi key down until the green indicator light comes on.
2. Press the TV key. Key press #1
3. Press the VCR key. Key press #2
4. Press the Channel + key. Key press #3
5. Press the Volume + key. Key press #4
6. Press the Power key. Key press #5
7. Press the Multi key. Key press #6
8. Press the Stop key. Key press #7

The Multi key is pressed because this multi function sequence contains less than 10 key presses.

B. To perform the programmed Multi function sequence:

Press the Multi key.

Note: If you want to change your Multi function sequence, follow the steps to program a Multi function sequence. Your old Multi will be re-

KEY FUNCTION DIAGRAM

1. Check LED indicator: This light will turn on or blink depending on the function that you are performing. The instructions in this manual will explain the normal operation.
2. Power key: Press this key to turn on the selected device or off.
3. TV mode key: Press this key to control your TV features.
4. CD mode key (CD-340 only): Press this key to control your CD player features.
5. 0-9 keys: These keys for numerical or CD tracks.
6. TV/VCR key: Press this key to switch between the TV and VCR modes.
7. Volume + key: Press this key to increase the volume.
8. Volume – key: Press this key to decrease the volume.
9. Mute key: Press this key to mute the sound.
10. Multi sequence key: Press this key to program or perform a multi sequence function.
11. Fast forward key: Press this key to fast forward a videotape or CD.
12. Step key: Press this key to play the program recording, expanding on fast forward or reverse of videotape.
13. Pause key: Press this key to pause the playback of a CD.
14. Record key: Press this key to start recording or playback.
15. Rewind key: Press this key to rewind videotape or CD.
16. Skip key: Press this key to start or resume the playback of a videotape or CD.
17. Surf key: Press this key to program the "Surf" speed to scan through the channels. On the Jensen TV, this key is used in the Auto Code Scan option.
18. Channel + key: Press this key to go down a channel.
19. Channel – key: Press this key to go up a channel.
20. Fast forward key: Press this key to switch to the last channel. On the Jensen TV, this key is used in the Auto Code Scan option.
21. Enter key: Press this key to enter a channel in the CD, press this key to enter a last number 10 or to skip or shuffle.
